Web Developer

8344283430 | inthrajithvijayan47@gmail.com | Bachelor of Computer Applications | 2018 – 2021 |
Nagappatinam - 614809, Tamil Nadu

SUMMARY

Web Developer with 4+ years of experience building scalable web applications. Expert in modernizing legacy systems and architecting cloud-native solutions using **ReactJS, NodeJS, and PHP**. Proven ability to implement asynchronous background processing with Redis and Celery, and to integrate secure payment gateways such as **Stripe**. Skilled in managing cloud storage (AWS S3) and optimizing database performance across MySQL and MongoDB.

SKILLS

HTML5, CSS3, Bootstrap, Tailwind CSS, ReactJS, NodeJS, PHP, MySQL, MongoDB, Redis, AWS S3, GitLab, Jenkins, Postman, Stripe API, PayPal API, PHP Resque, Celery JS, Kafka JS

Experience

Web Developer, Outrise Technologies / Fonicom Limited, Pondicherry, India, February 2022 – Present

- **Cloud Backup System (React.js, Node.js, AWS S3):**

- Architected a secure SaaS backup platform, integrating **AWS S3** for scalable, durable object storage of user data.
- Implemented **Stripe Payment Gateway** to handle recurring subscription billing, auto-renewals, and invoice generation.
- Designed a **Microservices** architecture using **Celery** to decouple heavy file compression and upload tasks from the main thread, ensuring zero UI lag for users.
- Utilized **MongoDB** to store unstructured metadata and logs, while keeping user account data structured in **MySQL**.

- **Datacenter Management System (AngularJS, PHP):**

- Developed a real-time server monitoring dashboard using **AngularJS**, visualizing critical metrics (CPU, Memory, Heat).
- Optimized PHP backend performance by refining complex **MySQL** queries, reducing report generation time by 40%.

- **Raiseaticket - Ticketing Tool System (AngularJS, PHP, Redis):**

- Engineered a high-volume ticketing platform, transitioning specific modules into **Microservices** to improve maintainability.
- Implemented **Resque with Redis** to handle background job processing for email notifications and SLA calculations, preventing server timeouts during peak traffic.
- Built the frontend interface with **AngularJS**, ensuring seamless two-way data binding for real-time ticket status updates

- **Corporate Web Development (WordPress):**

- Customized **Avada** themes and developed custom PHP plugins to meet specific client business logic.
